

Quality Without Compromise

At CrossTech, we care and that's why we're pleased to be able to meet your print needs while helping to preserve our environment. Our Heidelberg Speedmaster Offset Press and HP Indigo 7600 Digital Offset Press both provide high-quality printed materials while minimizing waste and the use of hazardous chemicals in the process.

Heidelberg Speedmaster 74 Offset Press

The Speedmaster 74 achieves high-end printed results in a revolutionary package. By minimizing waste in the startup process, the Speedmaster 74 ensures efficiency with every project. Its quick make-ready allows for projects from small to large and every point in between. The Speedmaster 74's 29" x 20" format also provides for larger pieces. These unique features mean that the paper, plates and ink used to produce your project go into the finished product... not the landfill.

HP Indigo 7600 Digital Offset Press

The Indigo is state-of-the-art in digital printing. On-demand, for runs from one copy on up, the 7600 is an ideal choice for today's quickly changing needs in a 13" x 19" format. The complete digital workflow eliminates waste and virtually insures that no product goes to waste. Combined with the ability to print on a variety of substrates, the 7600 provides the flexibility needed in today's market.

Different Technologies, Same Results

While the Speedmaster 74 and HP Indigo presses are unique in their own right, they achieve the same dramatic savings in economic and material waste. That is why each of our presses share these valued traits:

- No chemicals used in the imaging process
- Extremely short make-ready time and materials waste
- On-demand for "just-in-time" production, eliminating obsolescence of printed materials
- Cartridge loaded inking for minimal waste
- Press calibration for consistent results (less color adjustment waste)
- Recycling program for spent consumables and byproducts

Because...

The Earth is our home for just a little while and the task remains to each of us...leave her better than when we arrived. We all have jobs to do that require high-end results and CrossTech is pleased to make this promise that we can all live with...

Quality without compromise.
